

Antenna mast

PN (RN): **2036.100.39**

It is intended for use in field conditions to install all types of GROUNDPLANE antennas supplied by DICOM. Individual sections are made of composite materials characterized by high rigidity/weight ratio and high resistance to environmental conditions. The mast is anchored on two levels with three anchor guys at each level. If necessary, the mast can be attached directly to the vehicle by mounting adapters.

Technical parameters

Top load	up to 10 kg (depending on the soil surface)
Wind resistance	130 km/h
Number of sections	8
Erected mast height	9 m
Lowered mast length	1.8 m
Antenna mounting adaptor	40 mm diameter spigot
Mast setup time	10 min. (2 operators)
Mast weight without accessories	12 kg
Color	NATO army green 24x5
Operating temperature	-30 °C to +55 °C
Storage temperature	-40 °C to +70 °C
