

# RF1350 - Mobile set

Type designation: **RF1350**

PN (RN): **2011.041.22**

This mobile set with maximal adjustable output power of 50 W can be installed in all wheeled and tracked vehicles. By adding the AF13 co-site filter to the set, we made it possible to simultaneously operate more mobile sets in one vehicle. The filter tunes automatically when the frequency of the set is changed. If the mobile set is designed for installation in wheel vehicles without artillery or mortar weaponry, or for fixed posts, you may use the lighter, non-cushioned frame 7007.100.30 instead of springcushion frame 7007.100.20. All components of the set are installed in a springcushion frame. Technical parameters of the set are identical with [2011.041.61](#) mobile set.
