SC40 - Stationary charger

Type designation: **SC40**

PN (RN): **7410.100.01**

Designed to charge up to 8 LP40 batteries in both versions. The charger is installed in a watertight plastic case, which ensures high mechanical resistance, ease of transportation and storage of accessories.

Operating features

• charging or discharging the battery in each position separately,
• clear indication of operating modes by two LEDs - signaling charging, end of charging and any fault conditions,
• standard mains 100 VAC to 240 VAC power supply,
• optional 24 VDC vehicle on-board power supply,
• optimized charging mode controlled by bus communication between the battery and charger,
• USB interface for connection to a PC, which together with the control program allows the user to use the advanced features of the charger.
