

MESIT

M20 Communication Headset - Hearing Protector is a light, easy to wear headset designed specifically to integrate with most ballistic helmets.

The M20 provides both peak impulse and steady-state high noise protection, situation awareness and connection to any communication system.

M20

Communication Headset Hearing Protector

Sizing & Fitting

Adjustable neckband, headband or rail mount option.

Replaceable components

Modular design for quick battlefield replacement of microphone, keyboard, headband, neckband and ear pads by operator including 2 x AAA batteries.

Microphones

Easily adjustable and replaceable noise-cancelling flexible boom microphone.

Talk-Through

Delivers high level 360° situation awareness through 4 external microphones. Switches ON/OFF and sets ambient noise level while maintaining peak impulse protection.

PTT Switches

The PTT switch located in-line, enabling radio and intercom keying.

Helmet Compatible

Designed to seamlessly integrate with current military helmets such as PASGT, FAST, VIRTUS etc. including mandibles and face visors.

Multiple Connectivity

Pluggable, 'Breakaway' design for rapid disembarkation with option to connect to any communication system via a PTT or personal communication interface as required. Down leads can be pluggable and interchangeable by end user.

Dual Ear Communications

Left and Right ear audio can be configured to end user requirement.

User Friendly Maintenance

Modular, pluggable design for effective, efficient battlefield repair by component replacement by the user.
